## **uKNIGHTed Strategic Planning Survey**

As we work to make St. Andrews University a more cohesive, student-centered community and shape our strategic plan, your input is crucial. We invite you to reflect on our identity and goals as we address these key questions together.

1. What do you see as our institution's most significant strengths that set us apart?

2. What are the most critical needs or areas for improvement that we should address to move forward?

3. How would you define success for our institution over the next five years, and what specific achievements would illustrate that success?
